

Global Cars

What is Global Cars?

Global Cars is a new car leasing concept powered by Global Cars crypto token (GCT), helping you **generate huge profits.**

What is Global Cars?

First car leasing company that accepts **crypto payments**.

6

The **Global Cars crypto token** (GCT) will rise in value as more cars will be leased.

Global Cars shares its profits with its members, by offering **big discounts, or even free cars.**

What is the Global Cars Token (GCT)?

Dedicated to the Global Cars concept, the GCT is backed by physical assets, i.e. the Global Cars fleet.

The more cars are leased, the more value will be created for the token, and the higher the token can **rise on the market.**

HOW Global Cars Works?

One Condition

You must become a member of Global cars, and pay a yearly membership fee of **100 €.**

Membership

Become a member of Global Cars.

As soon as members have leased a car, they can enjoy a Loyalty Bonus, which will depend on the growth and profits of the company.

The more profits, the higher the Loyalty Bonus will be. The Bonus will be in the form of a discount, and may even result in a free car lease.

Members will also be able to earn a Sales Bonus, if they refer new members to Global Cars.

At the launch of Global Cars, we offer the opportunity to become a Founder and **buy Founder Shares**.

These Founder Shares will receive dividends all year round. A Founder Share will cost **999 €** and will be paid in the GCT token.

How Much Dividend Can I Earn?

WHAT CAN I DO WITH THE DIVIDEND?

There will be a limited number of 10.000 Founder Shares issued, but there's no limit to the number of members, nor the dividend. You can use the dividend to pay for your own car leasing contract.

You can withdraw the dividend as GCT tokens. You can sell the token, or keep it, since the value of the token should **increase over time**.

AWESOME

As long as there are Founder Shares for sale, you can use the dividend to buy more Founder Shares.
